8. Quick Reference	7

1. How the Site Works

Members apply via website → You approve in Admin Panel → Card appears automatically → Lounge access created

- Members apply via the website form
- Applications appear in your Admin Panel for approval
- Once approved, the member card appears on the site automatically
- Lounge access is created automatically

2. Admin Panel — All Tools

Access the Admin Panel

1. Go to `your-domain.com/members.html`
2. Log in with your admin email
3. Click the ⚙️ **Admin** button (top right)

List Users

Shows all Lounge members in your chapter with their status (Confirmed or Pending).

Create User

1. Click Create User
2. Enter their name and email
3. Click Create & Send Invite
4. They receive an email with a temporary password
5. On first login, they set their own password

Delete User

Removes a member's Lounge access permanently.

Resend Pending

Resends invitation emails to members who haven't logged in yet.

Promote Challenger

When a Challenger completes their 12th certification:

1. Click Promote Challenger
2. Enter their email

Backup Status

Shows the latest backups of your chapter's site. Backups run daily (7-day retention).

Export CSV

Exports the list of all Lounge users as CSV for reporting.

Show Metrics

Displays site visitor metrics (total visits, unique visitors).

Backlog

Shows the project backlog for your chapter.

Architecture

Live infrastructure diagram of your chapter's AWS resources.

Operations Guide

Downloads this PDF.

3. Approving New Members

When someone applies via the website:

1. You'll see their application in the Admin Panel under "**Pending Applications**"
2. Review their credentials (check Credly for 12 active AWS certifications)
3. Click **Approve** — the member card appears on the site automatically
4. Lounge access is created automatically

4. Approving Articles

When a member submits an article:

1. You'll see it under "**Pending Articles**" in the Admin Panel
2. Review the content
3. Click **Approve & Publish**

5. Member Validation Process

Before approving a member, **always verify**:

1. **Check Credly:** Confirm they have all 12 active AWS certifications
2. **Check LinkedIn:** Confirm identity matches
3. **If Challenger:** Verify they have 10 or 11 certifications
4. **Only after verification:** Approve

Never approve a member without verifying their certifications.

6. DO NOT TOUCH — Protected Systems

These are managed by the Founder. Do not request changes to:

System	Why
Infrastructure (CloudFront, S3, Lambda)	Managed centrally
Authentication (Cognito)	Shared across chapters
CI/CD pipelines	Automated deployment
DNS configuration	Critical for site availability

If something breaks: Contact Ricardo (Founder) immediately.

7. Troubleshooting

Site not updating

- Wait 1-2 minutes (deploy takes time)
- Hard refresh: `Ctrl + Shift + R`

Can't access Admin panel

- Make sure you're logged into the Lounge first
- Hard refresh
- If still broken, contact Ricardo

Member didn't receive invite

- Use "Resend Pending" in Admin Panel
- Ask them to check spam folder

8. Quick Reference

Task	How
Approve new member	Admin Panel → Pending Applications → Approve
Approve article	Admin Panel → Pending Articles → Approve
Create Lounge user	Admin Panel → Create User
Delete Lounge user	Admin Panel → Delete User
Promote Challenger	Admin Panel → Promote Challenger
Check site stats	Admin Panel → Show Metrics
View backups	Admin Panel → Backup Status
